

SAFETY SYSTEMS

SAFETY SYSTEMS

YOUR SUPPLIER IN THE SECURITY TECHNOLOGY SECTOR

Our work is based on trust, technical expertise and discretion. Whether consulting, planning or expert reports, the orders our customers place with us challenge and motivate us to achieve top performances. Given our over 60 years of experience in the security sector, we guarantee future-oriented concepts that are sure to convince you.

We develop and produce mechatronic security products for the Swiss and European market in the following sectors:

- Bank security
- Corporate security
- Safes and fire protection cabinets

SWISS QUALITY YOU CAN BE SURE OF

Our aim is to develop and produce innovative security products for our customers, which assure them the highest possible degree of security.

Manuel Fülleemann | CEO

Simon Schefer | COO

SECURITY CONSULTING

Security against theft, break-ins, hold-ups, abductions

Security is a basic human need. We can make a significant contribution to assuring your protection.

Consulting for banks, companies, private individuals

For projects of any size, we provide our customers with expert security advice. Working closely together with our customers, we devise the best possible and most practicable solutions. We look after all the organisational and security consulting tasks for new buildings and building conversions in the banking and industry sector.

Planning and project management

Besides the quality of our high-tech proprietary products in the banking, corporate and safe sector, our strengths also include security planning and project management.

Expert reports

Where break-ins are concerned, we are seeing an ever-increasing number of physical attacks on vaults and safes. We prepare insurance reports on the basis of our technical expertise and wealth of experience.

BANK SAFETY 060

BANK SECURITY

Banks have very special security requirements. Whether for transactions in the service counter area, the use of customer safe deposit boxes or the safekeeping of important documents in a customer safe, customers expect only the highest of security standards.

We have developed two types of access control systems, namely our MS SESA swing-door lock system and our MS CONTACT booth lock system, both featuring an integral emergency exit door, with a European patent. They can be easily integrated into an existing bank network and permit central management from the main office.

Our very latest innovative product, the VALIOMAT 24-hour customer safe deposit box system, incorporates state-of-the-art advanced technology.

MS PROTECT AG is your specialist for bank security with its proprietary mechatronic security products. We devise a security system that is tailored to your specific needs, assume responsibility for its implementation and the subsequent support.

SAFETY CABINETS

SAFES AND FIRE PROTECTION CABINETS

In recent years, even the traditional safe has become more technically sophisticated. In addition to different types of electronic locks, ever-more exacting requirements are placed on safes. They are becoming lighter, stronger and more secure.

In conjunction with a standard classification system, we have certified our new safe generation according to European standards (EN).
