4 Valiomat

24-h customer safety deposit lockers

With our automated customer safety deposit lockers for rental, you invest not only in security but also in comfort and reliability for your customers. You will offer a service that meets their needs and guarantees you the highest level of security and flexibility.

Design options

Ground floor system with issuance from front or side

Basement system with straight or sloped issuing tower

Multi-storey system with one or more outputs

Several safe systems with multiple outputs

A key advantage for you...

Not only do you get a state-of-the-art security system but also a solution that adapts to your needs seamlessly. Thanks to the modular design, the system is individually tailored to your spatial requirements, which offers you unparalleled flexibility – including for future expansions.

...and your customers

Your customers have access to their bank deposit boxes around the clock. Your customers can access their valuables at any time in a discreet room that ensures maximum privacy. Verification is carried out by means of a customer card and an access code on a user-friendly control panel.

24/7 accessibility

Compartments and Box

Discover how
it works

The metal boxes are stored and transported on rollers. Thus, items are transported extremely gently, whereby the contents of the compartments are optimally protected. The smallest cassette corresponds to one unit and is 50 mm high, 245 mm wide, and 355 mm deep.

| | |
|-----------------------|----------------------------------|
| Compartment S | One unit (50 mm high) |
| Compartment M | Two units (110 mm high) |
| Compartment L | Three Units (170 mm high) |
| Compartment XL | Four Units (230 mm high) |

Modular storage system

Thanks to the modular structure, up to four rows of blocks can be operated in one system. The bank safe deposit lockers are thus very compact and expandable.

Safety deposit lockers for rental

Discover the world of conventional deposit lockers

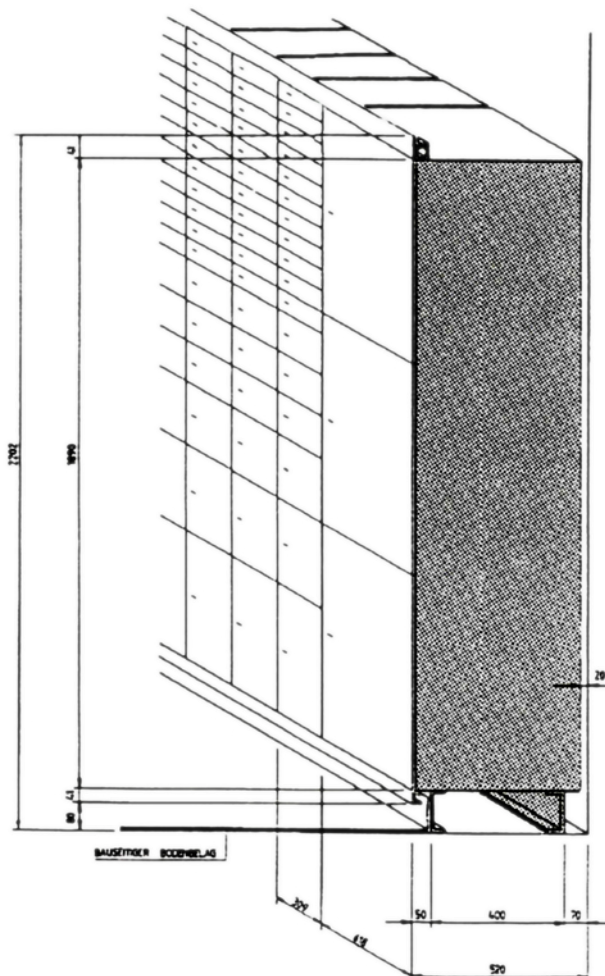

With our conventional customer safe deposit lockers, you offer your customers a traditional experience of storing valuables. This solution ensures the highest level of security, flexibility and adaptability of the deposit lockers.

A key advantage for you...

lies in the optimal use of the existing spatial conditions thanks to the modular structure and variety of design. This allows seamless integration into your planned or existing architecture.

...and your customers

Easy operation and the highest level of security when it comes to storing valuables are additional advantages. Depending on the access concept, your customer can open their lockers independently via the access terminal using a safe card, which offers them the highest level of discretion.

Compartment sizes

| Compartment size | Compartment height in mm | Compartment width in mm | Compartment depth in mm | Compartment clearances | | |
|------------------|-----------------------------|----------------------------|----------------------------|------------------------|-------|-------|
| | | | | Height | Width | Depth |
| 1 | 63 | 309 | 505 | 52 | 247 | 452 |
| 2 | 126 | 309 | 505 | 119 | 247 | 452 |
| 3 | 189 | 309 | 505 | 182 | 247 | 452 |
| 3b | 189 | 618 | 505 | 182 | 556 | 452 |
| 4 | 252 | 309 | 505 | 245 | 247 | 452 |
| 4b | 252 | 618 | 505 | 245 | 556 | 452 |
| 5 | 315 | 309 | 505 | 308 | 247 | 452 |
| 5b | 315 | 618 | 505 | 308 | 556 | 452 |
| 6 | 378 | 309 | 505 | 371 | 247 | 452 |
| 6b | 378 | 618 | 505 | 371 | 556 | 452 |
| 7 | 630 | 309 | 505 | 623 | 247 | 452 |
| 7b | 630 | 618 | 505 | 616* | 556 | 452 |

A maximum of 30 units of compartment size 1 are possible per block of safes.

* Cover plate and tray with lower reinforcement element

Compartment
size 5 with
adjustable
shelf.

Box sizes

| Size | External and internal dimensions | | | Material |
|------|----------------------------------|----------|----------|-------------|
| | Height mm | Width mm | Depth mm | |
| 1 | 52/47 | 245/238 | 445/377 | Plastic Box |
| 2 | 110/115 | 245/236 | 445/365 | Plastic Box |
| 3 | 180/178 | 252/244 | 448/423 | Metal Box* |
| 4 | 240/238 | 252/244 | 448/423 | Metal Box* |

* = possibly 2 plastic Boxes

Access terminal (self-service)

12 Software

Learn more about the software.

Our software is characterized by being extremely simple to use and by a high level of security. Whether automatic or conventional rental safety deposit lockers, our software can do both – combined solutions are also possible.

Our software combines user-friendliness with state-of-the-art security technology. Thanks to encrypted access media and regular (security) updates throughout the entire product cycle, operational safety is always guaranteed. This ensures the highest level of protection and trust.

...a key advantage for you

We are proud that our devices have never been successfully attacked (such as skimming or sabotage) by strangers. This underlines the high reliability and security of our software and ensures the best protection of your customers' valuables.

Integration into various banking software systems is possible.

Networking of several systems

Ongoing monitoring of the systems

Additional authentication

With OTP (one-time password) or biometrics

The additional authentication feature with a one-time password (OPT) offers the highest level of security for access and provision of the compartments.

A key advantage for you...

is the possibility of offering your customers the securest system. With free provision of the MS Secure app, which integrates OTP authentication, you can offer your customers the highest security standards. This increases confidence in your system and improves your competitiveness

...and your customers

OTP authentication offers the highest level of security and user-friendliness. By using one-time passwords, which are regenerated every time the locker is accessed, your customers valuables are optimally protected. This ensures an additional feeling of security and increases confidence in your service.

We will be happy to develop the best solution

The latest technology

Biometric authentication

Continuous development

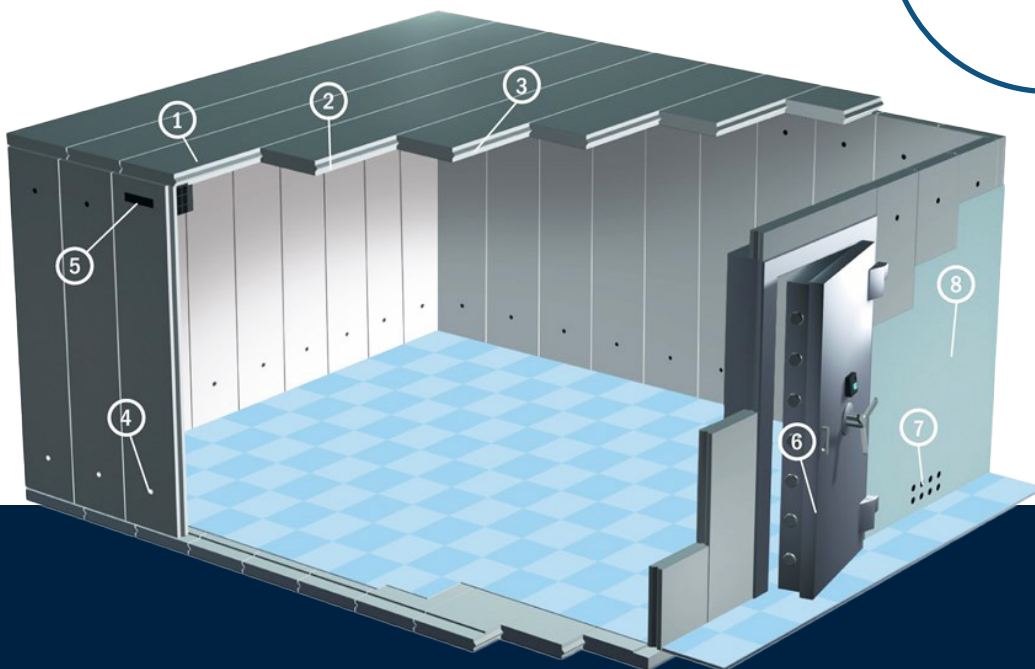

Vault

Our solutions are based on modular element safes or solid constructions and are precisely adapted to the spatial conditions of your building. These individually manufactured vaults are certified according to VDS/ECB-S (ENV-XIII) and offer you and your customers the highest level of security and reliability.

Modular structure

Solid, concreted vaults are seldomly newly built. However, existing vaults can be easily converted. 24-hour safe deposit lockers can be installed in existing vaults, provided that the structural conditions permit this. This allows you to use existing structures efficiently, resulting in lower investment costs.

We will be happy
to develop
the best solution

- ① Modular floor and ceiling elements
- ② Construction made of sheet steel, filling with special concrete
- ③ Inner cover made of metal (interior construction on site)
- ④ Cable installation (inner diameter: 20 mm)
- ⑤ Certified ventilation system
- ⑥ Vault door, optional daytime door possible
- ⑦ Certified ventilation system
- ⑧ External cladding of the vault elements with bare concrete, cladding on site

Space for Valimat compartments

Space for bank safe deposit
